Friction welding machine RS02

The patented Friction welding machine RS02 for Polyurethane profiles

FEATURES AT A GLANCE

The patented Friction welding machine RS02 for polyurethane profiles eliminates downtime with a perfect splice every time!

- User-friendly and easy handling.
- No long heating-up and set-up times, spliced within seconds.
- Precise pressure and automatical O-positioning prevents uneven welds and premature failure.
- Automatic alignment ensures that the belt ends are aligned perfectly.
- Temperature variation is never a concern (no guess-work).
- Without the risk of injury or fire due to hot metal.
- Due to its small size the RS02 press can be used in confined spaces.
- Thanks to its exchangeable jaws the RS02 is suitable for splicing many different profiles up to \varnothing 6 mm made of Polyurethane.
- 100% repeatability.

Perfect splice within seconds!

Exchangeable jaws for different profiles

HIGHLIGHTS

- The RS02 Friction welding machine is the perfect solution for fast and perfect welding polyurethane profiles.
- ➔ With the RS02 prevent belt breaks or expensive downtimes!

Scope of delivery:

- 1 pc. Friction welding machine RS02
- 1 set of standard profile jaws at your choice
- 1 pc. Allen key
- 1 pc. Scissors AS02
- 1 pc. Edge cutter SE02
- 1 pc. Carrying bag with durable and protective foam inlay

Dimensions (HxWxD): 390x105x123 mm

Weight: approx. 2452 g
